## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 10-13 are rejected under 35 U.S.C. 102(e) as being anticipated by Babinetz et al. (US 2004/0152292 A1).

Babinetz teaches a wire loop having a base (68) and neck (62) with a first extension of wire from the base in a direction toward another wire bond and a second extension of wire (62 to 67) running substantially horizontally from the base at substantially the same height as the top of the base toward another wire bond (figures 8 and 11A and paragraphs 48 and 51). It is noted that there is no disclosure of connection to a second bond, merely a base, a neck and extensions of wire toward a bond. As shown in figure 11A, the highest point of the wire loop is approximately the 1.0 times the diameter of the wire. Wire diameter is approximately 1 mil (paragraph 43).

### ***Response to Arguments***

3. Applicant's arguments with respect to claims 10-13 have been considered but are moot in view of the new ground(s) of rejection.

***Allowable Subject Matter***

4. Claims 1-9 and 10-14 are allowed.

***Conclusion***

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Lim et al. (US 2004/0050056 A1, similar loop structure, neck and ball not integrally formed.

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
